

Drone Intelligence for Prisons

Complete Tracking, Intelligence,
and Awareness of Drone Threats

Drones Pose an Immediate Threat to Your Facility

Drones make banned substances easily available and introduce danger inside prisons everywhere.

Drugs	Alcohol	Tobacco
Weapons	Cellphones	Other contraband

Unauthorized Drone Sightings by Year

11,412 FAA UAS sightings from 2018 - 2023*

1,902 sightings per year

100+ sightings per month

Drone Numbers in the USA

1M registered drones

1.5M unregistered drones

10M consumer drones expected to ship by 2030

SkySafe provides Drone-Detection-as-a-Service (DDaaS) that automatically identifies unauthorized drone activity and empowers you to take back control of your airspace.

Comprehensive airspace management, every drone, every signal

150 people arrested in bust of ring using drones to smuggle drugs and guns into Georgia prisons

- NBC News

Prison airspace violations are becoming a significant threat.

2023

Three men arrested for attempting to fly tobacco, narcotics, and cellphones into a Davisboro prison

2022

20 arrested in connection with contraband drops by drone at a South Carolina prison

2019

Three men indicted for attempting to smuggle contraband into a Central Georgia prison with a drone

2017

29 drone sightings reported at South Carolina prisons

SkySafe will help your federal, state, or private prison neutralize these threats.

SkySafe gives prisons the real-time drone data and analytics they need

Tracking.

Intelligence.

Awareness.

With the advancement of drone technology and its personal and commercial expansion, **detection** has become only **one component of resolving potential threats**. Antiquated hardware-based systems that can identify airborne objects no longer serve as the frontline of defense for the aviation industry facing drone threats. The key aspects of resolution come down to **speed of operator detection, staying ahead of an evolving threat landscape**, and the proprietary ability to **analyze drone flight patterns**.

Effortless Experience

1

Enjoy effortless access anytime, anywhere, from any of your devices. With no hardware or software to maintain and upgrade, our cloud-based drone intelligence platform is always up-to-date and fully scalable to your needs.

Actionable Insights

2

Detect and resolve drone incidents at their source with the most robust drone flight data set available, covering over 95% of drones in the US market. World-class drone forensics capabilities fully support the new FAA UAS Remote ID standard.

Total Coverage

3

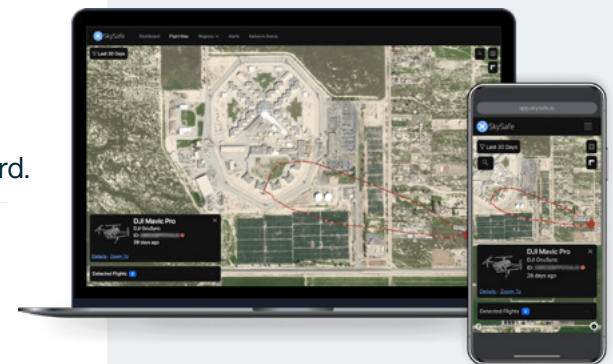

Detect, identify, track, and analyze unauthorized drones no matter where an incident occurs. Leverage city-wide (and beyond) airspace awareness, centralized intelligence, and consistent capabilities across the entire network.

Maximum ROI

4

SkySafe is made in the U.S.A. by leading experts. Further maximize your ROI with support from our customer success team partners.

SkySafe is the difference between detecting a single incident in the moment and keeping prisons secure against future drone threats.

Prosecutor-Ready Reports Generated for Every Incursion

SkySafe: The Most Comprehensive and Future-Proof Drone Intelligence Platform

We have one goal: Protect your airspace through awareness and drone management systems.

SkySafe is a global leader in Drone Detection as a Service (DDaaS). Tested and validated by the FAA, SkySafe's drone intelligence platform, which is Made in the USA, turns data into action to ensure airspace safety and security. Its cloud-based platform, the most comprehensive on the market, provides real-time and historical UAS identification, activity tracking, and telemetry data for teams responsible for protecting airports, corrections facilities, critical infrastructure, event spaces, and the public.

Founded in 2015 and based in San Diego, California, SkySafe was started by and employs recognized experts and leaders in the field of drone threat analysis.

FAQs

Do we have to install hardware?

No. With our proprietary and interconnected sensor network, SkySafe provides complete, maintenance-free coverage over your facilities, preventing you from wasting time, effort, or precious capital on expensive equipment. Simply log in to your SkySafe dashboard to monitor drone activity and see alerts.

How does the system keep up with new threats?

We constantly research, develop, and update our systems in real-time. SkySafe ensures you always have complete, consistent, and up-to-date coverage against the newest threats without the need to upgrade or install hardware.

What makes SkySafe the industry standard for counter-drone technology?

Our cloud-based platform employs the same cutting-edge technologies we have deployed with the U.S. military and allies. Our proprietary detection system differentiates between authorized and unauthorized drones in your airspace and triangulates the drone operator's location in a way that no other provider can match.

Can we get real-time alerts to threats?

Yes. Our system provides alerts in real-time to notify the appropriate staff in your organization about unauthorized drones – and their operators – crossing into your facility's airspace.

What kind of flight data is available in SkySafe?

Our platform provides the most robust flight data set available in the market today, including real-time alerts (drone location, altitude, velocity, operator's location, Remote ID), historical data (previous locations, flight paths), and forensics to detect and resolve incidents. Our sensor network detects more than 95% of drones in the U.S. market.
