SkySafe
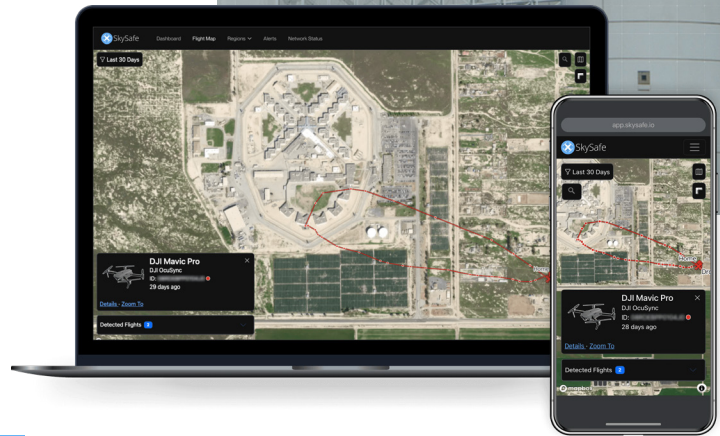

THE MOST COMPREHENSIVE AND FUTURE-PROOF DRONE DETECTION

Drone operators are an increasing threat to correctional facilities. In prisons, drones with growing capabilities are being used to deliver contraband like cell phones, drugs, and weapons. Corrections teams need a new, more sophisticated solution to detect, track, and extract intelligence from unlawful drones.

NEARLY
1M
Registered drones in the US

NEARLY
10M
Consumer drones shipped by 2030

23K
Contraband items confiscated across Georgia's prison system in 2022

$100K
Estimated institutional value of a single illegal delivery when seized

With more drones in the air, there are more threats to correctional facilities.

SkySafe Enables Correctional Facilities to:

- Get **real-time alerts** of drones entering airspace
- Pinpoint both the **drone and the operator's location**
- **Prevent the delivery of contraband** via drones
- **Gather evidence** to prosecute drone operators
- **Enhance the security** of airspace around the entire facility

" **Contraband drone deliveries are quickly becoming the bane of prison officials' existence.**"

—**U.S. Attorney Chat Meacham**
(Northern District of Texas)

Advantages of SkySafe

The most comprehensive and future-proof **Drone Detection as a Service (DDaaS)** solution

Effortless Experience

- No hardware to maintain or upgrade
- Fully scalable and always up-to-date cloud technology
- No additional resources needed
- Access anytime, anywhere, from any device

Maximum ROI

- Customer success team partners to maximize the ROI of your service
- Tested and validated by the FAA
- Made in the U.S.A.
- Constantly expanding capabilities and services, developed by leading experts and deployed at scale in real-time

Actionable Insights

- Detects more than 95% of drones in the U.S. market, as well as the operator's location
- The most robust drone flight data set, including: real-time alerts, historical data, and forensics to detect and resolve incidents
- Fully supports the new FAA UAS Remote ID standard

Total Coverage

- Networked coverage model provides citywide (and beyond) airspace awareness
- Consistent, up-to-date capabilities across the entire network
- Centralized intelligence to deliver actionable insights regardless of where incidents occur

Actionable Insights

Effortless Experience

Total Coverage
Maximum ROI

Drones Responsible for Increasing Contraband Problem

20 people arrested for using drones to deliver **over 100 lbs of contraband** to a South Carolina prison

A Maryland prison inmate who **recruited civilians through Instagram to deliver contraband** via drones is indicted

$1M worth of drugs to be delivered via drones to prisons across the country is confiscated in Louisiana

4 people charged with using drones to **deliver drugs and other contraband across 9 state prisons** in California

3 men accused of using drones to drop drugs at Ohio prisons face **116 criminal counts**

A New Era of Drone Safety is Necessary

Drones used to deliver contraband to inmates could also be used to surveil buildings, facilitate escape attempts, or transport explosives. As the threat from drones continues to grow, SkySafe is leading the charge to give correctional facilities the critical airspace awareness they need.
